HOW TO CARE FOR YOUR CABINETS, FINISH & WARRANTY INFORMATION

CARE & MAINTENANCE:

Please allow cabinets to cure six weeks before using any type of cleaning products on them. Cabinets are equal to furniture and cleaning products should be oil based or formulated for wood. Do not use water or any type of water based cleaners on cabinets. It is important to wipe up spills and water marks as they occur. Give special attention to areas around the sink and dishwasher. Avoid draping damp or wet dish towels over the doors. Over time, this moisture can cause permanent damage to the finish.

STAIN & FINISH INFORMATION:

The variation in pattern and color visible in the various stains and finishes is an element in the beauty of the wood, not a defect. As the cabinetry goes through the finish process, the color of each component is matched as closely as possible variations in the wood are emphasized in certain finishes such as glazing. No attempt is made to tone down or cover up these color variations in the wood. These potential variations are natural occurrences and are within standards established by the cabinet industry.

LIMITED LIFETIME WARRANTY:

We believe in quality craftsmanship. We also believe that quality craftsmanship should last your lifetime, not just a set number of years. Simply put, your investment is protected for as long as you own it.

What is not covered: The natural aging of the wood color, wear and tear, damage or defects caused by abuse, negligence, or alteration. Warranty is non-transferable. Please let us know if you have any questions.
